

SOYBEAN PRODUCT DATA

STINE® 28M32 BRAND

Maturity	28
SCN Resistant	Brown Stem Rot Susceptible
Rps Gene 1c	Height Medium

28M32 brand is the most consistent, well-rounded conventional soybean in Stine's lineup. It handles nearly any farming strategy but does especially well in higher-population, narrow-row environments. Strong ratings against sudden death syndrome mean you can plant this early, and Rps1c Phytophthora root rot resistance adds a measure of protection on poorly drained soils.
