SCN Peking	Brown Stem Rot Resistant

EXCLUSIVE LINE FOR 2026 Stine 14EE21 brand is a very good choice for heavy soil environments and features Peking SCN resistance. 14EE21 is a medium to moderately tall, semi-branching soybean that can handle poorly drained soil conditions. It performs best in wide-row, lower-population environments to let it bush out. For best results, keep it off light, high-salinity soils and open the canopy if Sclerotinia white mold is a risk.
