STINE® NEW
31S32 BRAND

PREMIUM GENETICS | ELITE SOYBEANS

Stine 31S32 brand is a consistent-performing soybean that branches nicely to close wider rows in highly productive ground. It features good standability, so it can be placed in any row association and excels in poorly drained soils thanks to Rps1c Phytophthora root rot resistance. Avoid placing it in highly calcareous soils, and for best results apply a seed treatment if planting early.
