## STINE® 44EH09 BRAND

Stine 44EH09 brand is the gold standard for root knot nematode resistance with good/very good standability and yield. 44EH09 is built for the heavy, iron-clad soils in the southern regions of the U.S. These genetics provide very good performance against Phytophthora root rot, iron deficiency chlorosis and root knot nematode, which makes 44EH09 extremely versatile and built for those tougher acres.
