

SOYBEAN PRODUCT DATA

STINE® 25EG02 BRAND

Stine 25EG02 brand is built for all-out yield in highly productive environments and features STS tolerance. It performs well across hilltops and maintains its height throughout the season. Plant 25EG02 at moderate populations in any row association. For best results, avoid poorly drained soils that have exhibited *Phytophthora* root rot. If *Sclerotinia* white mold has been present historically, open the canopy. 25EG02 is also sensitive to metribuzin when trying to control weedy fields.
