SOYBEAN PRODUCT DATA

STINE® NEW 29EK20 BRAND

Enlist E3® SOYBEANS

Deriving from the legendary 28M32 conventional line, Stine 29EK20 brand comes forward with its high-yield trend of 109.8% and solid agronomic traits to support its success. Plant it in 20-inch or wider rows at moderate to low populations to encourage branching. 29EK20 excels on highly productive, moderate- to well-drained soils and can be planted early due to its ability to excel against sudden death syndrome and Sclerotinia white mold. If planting in poorly drained soils, a seed treatment is recommended.
