STINE® 38EH02 BRAND

EXCLUSIVE LINE FOR 2027: Stine 38EH02 brand is a medium-height soybean that performs well on marginal ground, at lower populations and in wider rows. This line branches out with good vertical stature and fills in a good canopy to bring tremendous yield while reducing weed pressure. 38EH02 has good sudden death syndrome tolerance and prefers moderate- to well-drained soils to avoid Phytophthora root rot potential early in the season. If planting in poorly drained soils, a seed treatment is recommended.
