SOYBEAN PRODUCT DATA

STINE® NEW 47FH32 BRAND

TENDFLEX SOYBEANS

Maturity	47
SCN Resistant	Brown Stem Rot Resistant
Rps Gene 1c	Height Medium

Stine 47FH32 is closely related to 45FH23, combining a nice plant type with consistent agronomics across soil types. 47FH32 is best suited for moderate- to high-population strategies on marginal to poorly drained soil types. It features the 1c Phytophthora gene, brown stem resistance and STS tolerance. Although it has mixed flower color, that doesn't stop this soybean from being an elite yielder.
